The figure displays 48 individual line charts arranged in an 8x6 grid. Each chart represents the daily number of COVID-19 cases at a specific hospital in Hungary between 2016 and 2022. The y-axis for all charts ranges from 0 to 1000 cases. The x-axis shows the years 2016, 2018, 2020, and 2022. Most charts include data points for each year, with vertical error bars indicating variability. Some charts show a sharp increase in cases starting around 2021, peaking in early 2022.

Hospital Name	Approximate Peak Year	Approximate Peak Cases
Szent Schweitzer Kórház-Rendelőintézet Hatvan	2022	~800
Almási Balogh Pál Kórház, Ózd	2022	~800
Csongrád-Kiskun Megyei Kórház, Kecskemét	2022	~800
