The figure displays a grid of 48 small charts, each representing a different Hungarian hospital. Each chart plots the percentage of COVID-19 cases by age group (0-4, 5-14, 15-64, 65+) from 2020 to 2022. The y-axis represents the percentage (0-100), and the x-axis represents the year (2020.5 to 2022.5). Data points are connected by lines, and error bars are shown for each year.

Hospital Name	0-4 (%)	5-14 (%)	15-64 (%)	65+ (%)
